## EXPERIENCE

Bryodyn Technologies - Ashburn, VA
Software Developer
*2023-2024*

- Role: Senior Developer for the Mission Builder application.
- Responsibilities:
    - Developed and maintained the Mission Builder application, handling both front-end and back-end development.
    - Managed the entire application lifecycle, from database design to deployment.
    - Implemented new features and updated existing ones based on employer requirements.
    - Enhanced user interface (UI) and developed Android Debug Bridge (ADB) functionalities for app-to-phone integration.
    - Led the migration of the application to a new framework, involving extensive refactoring and rewriting of code.
    - Ensured seamless integration of the app with various databases and improved overall system performance.

Ohio State University - Columbus, OH
*Student*
*2022 - 2023*

Proficiently completed weekly tasks using an extensive range of advanced technologies. Collaborated with a team to complete three projects, "The Lazy Dater", "The Quizzinator", and "Cartoonify My Pic". Successfully demonstrated all projects to showcase the team's accomplishments. Gained valuable real-life experience as a Full-Stack Developer, working within a team environment to meet project goals and deadlines. Made a variety of applications and sites primarily using the MERN stack, and JavaScript.
